He has been with the company since 1989.**

Hymer Motorhomes

Always an original

For generations of holidaymakers, Hymer is the epitome of holidaying on wheels. And there is a good reason for this: Since the invention of the motorhome by Erwin Hymer in 1961, our vehicles have set standards and affect developments in this area of industry. Whatever class you are searching in: at Hymer you will always find the original.

We use this edge to offer you more – more choice, more comfort, more safety. Anyone who has been on the road in a Hymer motorhome will appreciate the difference. The thing that makes travelling a unique adventure here is the diversity of high quality details. And more than 50 years of experience that we draw upon to bring these details for you into perfect harmony.

You can gain a particularly good impression of this from the **new model year.** In the second half of this brochure you can find a detailed overview of the main equipment features, accompanied in each case by images and an explanation. This way, you can get to know the model series of your choice even better.

Of course, a description is no substitute for first-hand experience of the original. You should therefore take advantage of the opportunity at your Hymer trading partner to carefully look around your dream vehicle and, better still, take it for a test drive. Our close-knit dealer and service network in Germany and Europe provides you with the assurance that there is always first-class support nearby.

A general overview of the Hymer model series can be seen on the next double page. Here, you can compare the basic features of our motorhomes easily and conveniently – as an initial orientation aid to determine which vehicles best match your individual requirements. Further information about all available floor layouts and equipment versions can be obtained as always from your Hymer trading partner or www.hymer.com. You can also order the latest catalogues from there for all of the models.

If, in addition, you are among the growing number of Facebook users, we would be delighted to hear about your journeys and experiences at www.facebook.com/hymerAG. Many of our customers contribute to this site on a regular basis and make it a lively and informative place to visit. You can find valuable tips covering the whole spectrum of holidaying on wheels with the original. Experience them yourself: the mobile homes from Hymer.

"For us, the name Hymer is a bond. And for our customers a promise. These motorhomes offer the best performance and the best quality in any vehicle category."

Bernhard Kibler

The benchmark for mobile holidays

Hymermobil B-Class

Climb aboard, make yourself at home and enjoy all of the little luxuries: Experience the holiday vehicle that embodies this feeling like no other. As the favourite and best-selling motorhome model series in Europe, the Hymermobil B-Class sets standards for comfort and premium quality and has done so for more than three decades.

In this model year, too, the B-Class is distinguished again by pioneering new features with regard to choice, equipment and technology. With ten floor layouts of varying design, you have a whole range of intelligent space concepts available. From compact lateral bed models, generous living room and saloon-type vehicles to the luxury model with open washroom and free-standing queen-size bed.

All beds have the high quality multi-zone cold foam mattresses in common that adapt optimally to the body shape and thereby offer a particularly high level of sleeping comfort. They are included as standard in the same way as the wooden slatted bed frames that promote ventilation. Water splashes have no chance here nor in the numerous deep roof storage cupboards that are fully back-ventilated. The breathable interior walls made from plywood also contribute towards **the familiar cosy atmosphere** of the B-Class. They are part of the foam-filled Hymer PUAL wall design, which is unique in the world in combining leak-tightness, stability and the highest level of insulation. There are no cold bridges in a Hymermobil. This is assured, in addition to the PUAL design, by the double-glazed aluminium framed windows and high quality seals on all doors and exterior flaps.

A warm cosy atmosphere throughout the vehicle is instead a matter of course. With its diverse number of hot air outlets, the 6,000 watt Truma heater reaches all areas of the vehicle: from the hot air curtain above the instrument panel to the heater ducts all around the rear beds. Even the garage and the large exterior stowage compartment by the seating group are heated, in the same way as the trusted multi-purpose double floor. This serves not only as a comfortable underfloor heating system but also, at the same time, as a frost-protected storage space for the water tanks and the whole onboard installation. Its heated underfloor compartments can also be used as additional stowage space. As an alternative to the standard unit with hot air, an ALDE hot water system can also be fitted.

Beneath the insulated and heated multi-purpose double floor there is an indestructible GFK layer that protects the underbody reliably against all types of weather, salt or stone-chips. The floor

"There is always scope to further improve a model series, even one as well-developed as the B-Class. With the new models, this has once again been a resounding success."

Bernhard Sawetzki, Head of Series Production

itself is integrated in a special AL-KO lightweight frame. With its independent wheel suspension, wide track width at the rear axle and the optimised weight distribution, this frame plays a considerable part in the high driving comfort of the B-Class.

The 130 HP turbodiesel engine with 6-speed manual gearbox quells fuel consumption but not performance. In this way, you can negotiate even the steepest of mountain passes with ease in your Hymermobil. Here, and in many other demanding driving situations, you can rely furthermore on the support of intelligent safety systems, from ESP to the hillhold function. In terms of safety, there is no need to sacrifice anything here either. No time like the present, therefore, to climb aboard and find out for yourself ... »

Hymermobil B-Class – seen here with “Umbria Select” finish

"Every model has its own personal ambience. But all have one thing in common: You climb aboard and feel like you are at home."

Frank Venter, Head of Design

Hymermobil B-Class – Living comfort

01

02

03

The choice of intelligent living room concepts has never been as great as in the B-Class. In addition to the classic lounge area with L-shaped bench seat, there are also floor layouts with a huge round seating group in the rear (B 534), spacious saloon-type seating group (B 544) or opposing bench seats at the front (B 598). It's well worth trying them out.

04

05

01 Particularly comfortable round surround seating group with lowering pillar leg table in the rear of the B 534.

02 Cosy living room atmosphere in the B 534 – with clear, level access to the kitchen and cab.

03 Lounge seating group in the B 594 with fifth seating place on the right and sliding 360 degree rotating table.

04 Classic layout of lounge seating group with L-shaped bench seat and rotating pilot seats, as seen here in the B 594.

05 Generous living area in the B 594 with warm "Marasca Select" furniture finish and "Salerno" fabric design.

Hymermobil B-Class – Sleeping comfort

"All beds offer enough headroom so that you can sit up comfortably and climb in and out with ease."

Hansi Wiest, Team Leader Interiors

01

02

03

01 Access to the single beds in the B 678 with large, fixed steps and practical laundry compartments at the foot-end.

02 Classy queen-size bed in the B 698 in its reading position with tilted top section and neck support on the backwall.

03 Lateral bed in the rear of the B 594.

04 Easily accessible, height-adjustable rear lateral bed with fitted high wardrobe in the B 594.

04

Hymermobil B-Class – Washing comfort

"Completely partition off the open washing area from the living space or close the washroom/WC and shower separately – everything is possible here." **Anton Steigmiller, Furniture Maker**

01

02

03

01 Lots of space and full standing height in all shower compartments – as seen here in the separate shower cubicle of the B 598.

02 Variable washroom, seen here in the B 504, with rotating basin wall which makes it possible for it to be converted into a spacious shower compartment.

03 Separate washing area/WC in the open washroom of the B 598, with large frosted glass skylight and cabinets – as seen here in "Marasca Select" furniture finish.

04 Comfort washroom with separable, room-high shower compartment and wide bench toilet, as seen here in the B 534.

04

01

02

03

01 Deep drawers, that can be pulled right out, with lots of stowage capacity and flexible dividers.

02 Extra high tap for convenient rinsing and for filling large containers – as standard in all models.

03 Wide side kitchen in the B 504 with head chef lighting and kitchen roll holder above the sink – as seen here with "Umbria Select" furniture finish.

04 Elegantly designed kitchenette in the B 594 with large, deep worktop and split folding hob cover.

04

01

02

03

04

01 Spacious wardrobe with adjustable shelves and second clothes rail, as seen here in the rear of the B 504.

02 Practical shoe stowage flap in the entry area of the B 678.

03 Versatile underfloor storage compartments in the heated multi-purpose double floor, as seen here in the entry area of the B 594.

04 Elegant roof surround above the kitchen of the B 678, next to it the roof storage cupboards in "Umbria Select" furniture finish.

05 Large, easily accessible wardrobe in the bed box, as seen here beneath one of the single beds of the B 678.

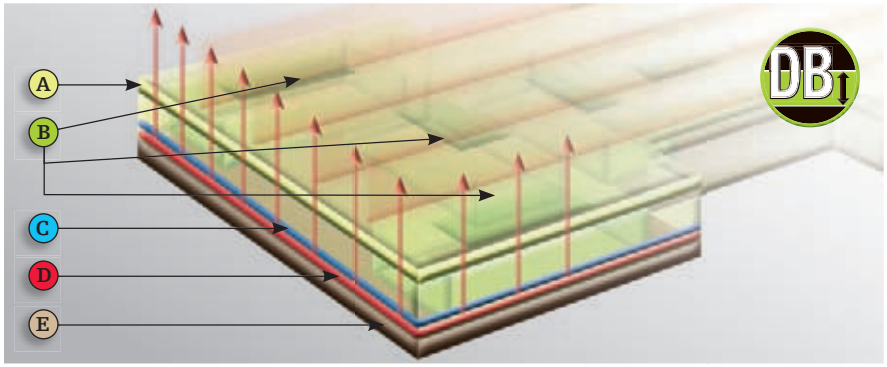

05

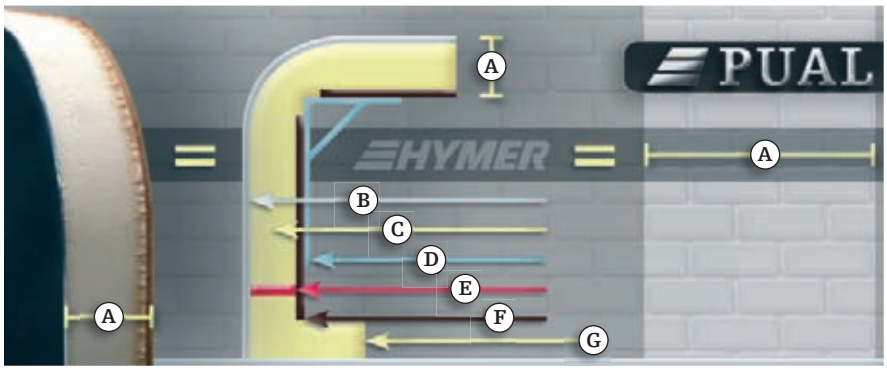

Hymermobil B-Class – Inside temperature

A nice temperature at any time of year

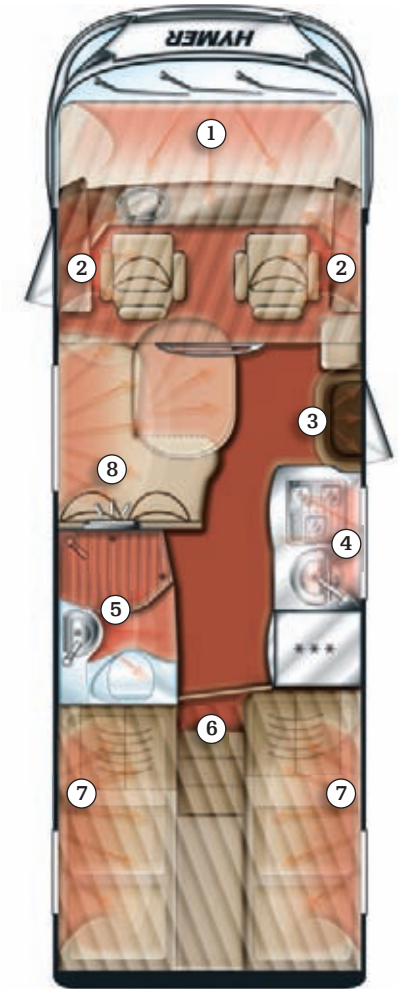

Perfect heat insulation, underfloor heating and "breathable" interior walls that capture moisture and release it again – in the Hymermobil B-Class, a cosy and healthy atmosphere is assured all year round. Frost-protected outer stowage compartments and installations mean the vehicle is completely winterised.

Versatile multi-purpose double floor:
Combined in an ideal way by the multi-purpose floor of the Hymermobil B-Class are warmth, security, stability and stowage space. Integrated in the extra strong, 3 cm thick flooring (A) are a wide range of heated storage compartments (B) that can be utilised conveniently from the inside of the vehicle. The installations and the water supply (C), too, are routed in the frost-proof heated intermediate space, which serves at the same time as a comfortable hot air underfloor heating system (D). The 3.5 cm thick flooring (E) provides perfect downward insulation.

Unique Hymer-PUAL wall structure:
Just 3.5 centimetres thick but the PUAL wall in the Hymermobil has the insulating effect of an 80 cm brick wall (A). The fine pored polyurethane foam (B) is joined completely to the sturdy aluminium outer skin (C) and the breathable plywood layer (D) inside the vehicle. The prevents cold bridges and ensures a very high level of stability - likewise provided by the plastic corner profile surround (E) and the full elastic bond (F) to the vehicle roof. The foam-filled GFK floor (G) rounds off the heat protection.

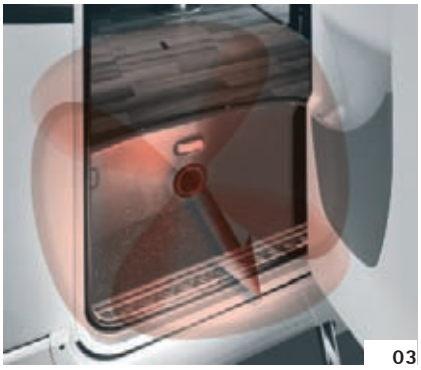

Comfortable, well-balanced heat distribution:
The heated multi-purpose double floor works like a complete underfloor heating system in the interior.
Together with numerous, optimally positioned hot air outlets, it creates a perfectly cosy climate throughout the vehicle.

Instrument panel:
Blower on the windscreen

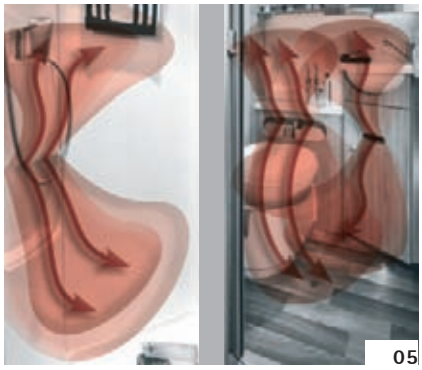

Living space:

Everything at hand, at all times

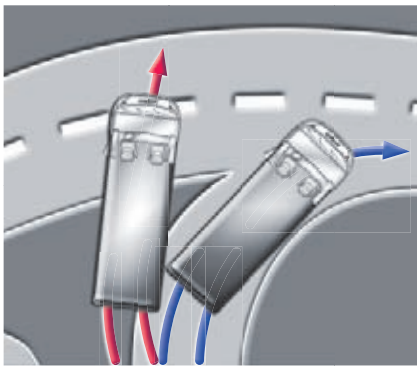

With the Hymermobil B-Class, the level of road safety is higher than it has ever been. It combines the high road safety standards from Hymer with the latest electronic safety systems. Thanks to this intelligent support and best visibility in the cab, you always feel in control – even in critical situations.

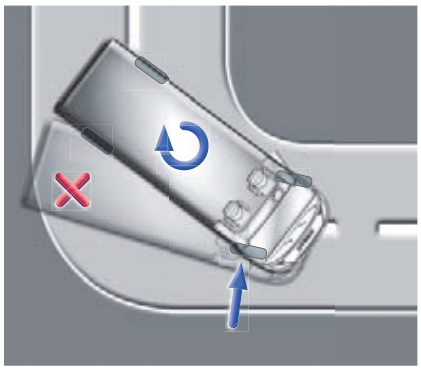

Driver and front passenger airbag:
Both seats in the cab are equipped as standard with Fiat airbags. In the event of an accident they are triggered in a fraction of a second and prevent severe head injuries. If an airbag is triggered, the seat belt is tensioned at the same time.

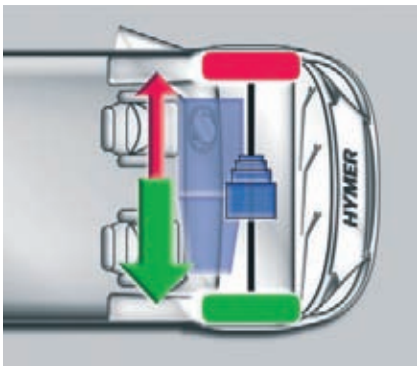

Anti-skid regulation (ASR):
If traction is lost at a wheel (wheel slip), this is detected by the electronics and the wheel is braked automatically. This makes it much easier to drive off and accelerate on slippery surfaces and the vehicle is prevented from sliding sideways at the rear.

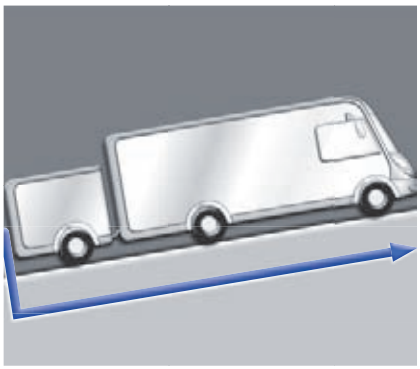

Anti-lock braking system (ABS):
Now somewhat of a classic among electronic control systems, this system prevents the wheels from blocking during emergency braking and, in this way, keeps the vehicle steerable. Familiar, light pulsation at the brake pedal can be detected during ABS intervention.

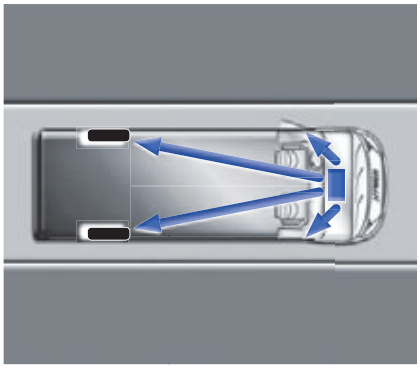

Electronic stability program (ESP):
In critical situations, skidding or breaking out of the vehicle is prevented by engine speed adjustment and by targeted braking of individual wheels.

Traction Plus:
In conjunction with ESP, this system ensures greater traction on difficult terrain by distributing the torque to the front wheels in a targeted manner. This makes it easier to drive-off on wet grass, for example, or manoeuvre over muddy ground.

Hill holder:
On gradients of about 5 % and steeper, this drive-off assistant maintains the brake pressure briefly after the brake pedal has been released. In this way, rolling back of the vehicle is prevented and comfortable drive-off is enabled – even in reverse.

Electronic brake pressure distribution (EBD):
This system apportions the brake force optimally to both axles depending on the situation. In this way, the greatest possible braking force is achieved and, at the same time, the vehicle is prevented from breaking out through "overbraking" at the rear.

Good view behind:
The large, heated exterior mirrors are colour coded and optimally positioned. They can also be adjusted comfortably by electrical means from the driver's seat. Thanks to the wide angle mirrors on both sides there is no blind spot next to the vehicle.

Perfect all-round vision:
The high panoramic front window and the large side windows in the cab really open up the view in all directions. Moreover, the area right in front of the vehicle is also clear to see from the driver's seat thanks to the lowered instrument panel. This unhindered all-round view creates not just a unique impression of "open plan" driving. At the same time, is also provides maximum overview and safety. The electric adjustable exterior mirrors and the optional reversing camera serve as a perfect supplement to this.

Daytime running lights as standard:
See and be seen is important in equal amounts when travelling by road. The daytime running lights are therefore a standard feature of the Hymer headlights. For unimpeded travel in countries where day driving lights are already compulsory.

Best vision in any weather:
The 3-arm windscreen wiper system on the panoramic front window ensures that the road can be seen even during heavy downfall. Thanks to the large, wide wiping range, edges of the road and crossroads can also be seen well. Every Hymermobil built in almost two decades to date can be identified by the three parallel wiper arm design, which has been continually optimised during this time. Independent tests confirm its outstanding effect and the good field of view from Hymer.

Illustrations for example only. Changes possible.

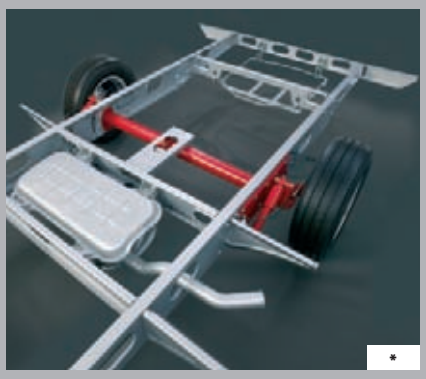

Hymermobil B-Class – Highlights from series production

Traditionally one step ahead

For more than 30 years, the Hymermobil B-Class has been constantly setting new benchmarks in convenience equipment. A good tradition that is continued in this model year too: with a range of top class and exclusive features in the comprehensive standard equipment package.

Frugal work horse:
The Fiat Multijet II engine with 96 kW / 130 HP embodies economical and sustained driving pleasure thanks to its low standard consumption. The lively and sturdy 4-cylinder turbo-diesel engine complies with the Euro 5 and EEV exhaust emissions standards.

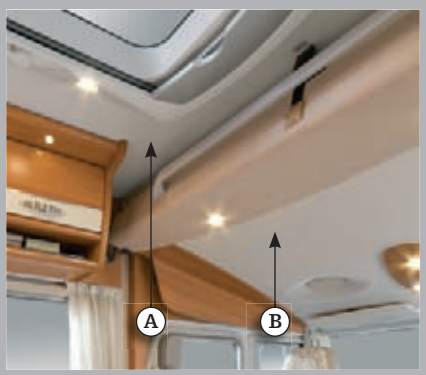

Tailored undercarriage:
The specially developed AL-KO lightweight frame with independent suspension forms the perfect basis for construction of the motorhomes. Its optimally positioned wheelbase assures equal weight distribution, even when the vehicle is fully loaded.

Access without barriers:
The engine compartment beneath the windscreen is easy to open and provides a large access area. This makes it convenient to check and replenish the oil, coolant and windscreen washer fluid. The lamps of the headlights are also easy to access and can be replaced extremely easily.

Perfect thermal protection:
The full foam, completely bonded PUAL wall structure provides a cosy living environment without cold bridges. With a thickness of just 3.5 cm, the Hymer PUAL technology, not found anywhere else in the world, achieves the same insulation performance as an 80 cm thick brick wall.

Calm driving and living comfort:
The high quality fabric trim on the ceiling (A) and on the underside of the pull-down bed (B) enable pleasant acoustics. Even the flock-finished instrument panel and the noise insulated driver door contribute towards a genuine feel-good atmosphere in the cab.

More light on the road:
Two bright LED reading lamps supply the cab if required with good lighting during a journey. The spotlights integrated in the furniture are attached to the underside of the pull-down bed and can be switched on from the driver and front passenger seat with ease.

*Does not apply to B 534 and B 598.

Discover even more highlights at a Hymer trading partner near you.

Best guard against dazzling light:
For a safe journey even when the sun is low in the sky, both seats in the cab are equipped with flexible sun visors. The visors attached to the pull-down bed can be adjusted for any sunlight intensity via two pivot points.

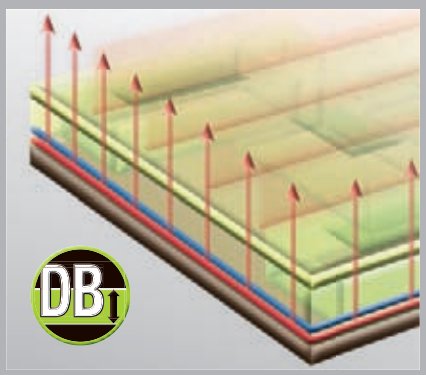

Permanent protection from underneath:
With its indestructible GFK underbody, the vehicles are practically immune from weather-related damage. Even stone-chips, grit and dirt are kept at bay by the underbody – a secure foundation for the entire service life of the motorhome.

Thermal protection in cab:
As in the living space, the best insulation properties are assured right at the front of the vehicle. The double skin GFK front-end, filled in between with a PU foam thermal insulation layer, ensures that cold is kept at bay in the front area of the motorhome.

View without cold bridges:
The high quality Seitz S7 window frames are equipped with double acrylic glazing – for optimal thermal insulation. The powder-coated aluminium frame is particularly lightweight and sturdy and also features an insulation layer to protect against cold bridges.

Comfort with double floor:
Underfloor heating effect, frost-protected installation level and additional, heated storage compartment – all of this is offered by the time-tested, 12.5 cm thick multi-purpose double floor with heated air nozzles between upper floor surface (3 cm) and underfloor (3.5 cm).

Guard against dirt:
All wheels of the rear axle are equipped with large mudguards. They prevent dirt or snow coming into contact with components close to the ground, such as the grey water drainage pipe or exhaust system, and adhering to these areas.

Illustrations for example only. Changes possible.

Hymermobil B-Class – Highlights from series production

More independence when travelling:
The large water tanks increase the range to the next filling station and thereby facilitate more freedom and spontaneity. The fresh water tank in the double floor has a capacity of 130 litres, the grey water tank holds 90 litres.

Helpful exterior light:
The powerful LED awning light with rainwater deflector is already part of the standard equipment. It illuminates a wide area outside the entry door, thereby making it safe to alight the vehicle in the dark.

Safe access:
The large entry door in the living area; with its electric step, it makes climbing aboard and alighting the vehicle safe.

No chance of moisture:
All of the vehicle doors and also all of the exterior stowage compartment flaps and doors are protected against rain and spray water by additional spray water seals. This means that there is no chance of water ingress between the door and frame and nothing will freeze shut in the cold.

Access all areas thanks to multi-function
The table, with a quality, real wood frame, can be moved both lengthwise and crosswise. In this way, it can be reached from any point and in any situation optimally – and is never in the way.

Comfortable all-rounder:
The swivel lounge seats in the cab are covered completely in the same fabric as the living space. With a high level of seating comfort and large, adjustable arm rests, they can be as inviting for a relaxed drive as a pleasant evening in front of the television.

A place for shoes:
Right next to the entry door there is a practical stowage flap. It can be accessed conveniently from the entry area and is ideal for comfortably changing in and out of shoes when climbing aboard and alighting the vehicle.

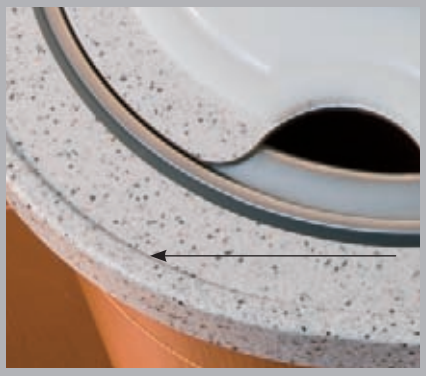

Unimpaired headroom:
All of the floor layouts have level flooring throughout the living space without platforms or steps. In this way, full and comfortable standing height is available in the whole living area, including the washroom and kitchen.

Discover even more highlights at a Hymer trading partner near you.

High lighting output, low power consumption:
An illuminated surround canopy provides excellent, well balanced lighting both in the living area and the rear sleeping area. Thanks to energy-saving LED technology, the power consumption is low despite a high lighting output.

Great basis for kitchen work:
The attractive and sturdy worktop with its classy mineral compound coating stays looking good even under the toughest of conditions. This is assured by simple wipe-clean edges and the high quality, solid mineral compound front edge.

Kitchen comfort like at home:
Large drawers in the lower kitchen cabinet, which can be partitioned freely, offer maximum stowage space for cutlery and cooking utensils, provisions and lots more. They can be pulled out quite far and allow convenient and easy access to all of the equipment stored there.

Cooking is fun this way:
Several large pots find space on the 3-flame cooker with electric ignition. The split folding glass cover serves as an additional work surface if required. The sturdy, fold-up grate and the removable knobs make cleaning child's play.

Washing up with plenty of elbow room:
The extra deep sink not only offers more space for washing salad and vegetables. Thanks to the high tap, large pots and utensils can also be washed without trouble. Tall receptacles can likewise be filled comfortably.

Brightly lit work surface:
The head-chef lighting above the worktop provides optimal lighting conditions in the kitchen. With its three recessed LED spotlights in the roof stowage compartment, it lights up the whole surface perfectly – with clear visibility of the cooking pots.

Washing and cutting included:
The cleverly designed kitchen has no dead space: With a turn of the hand, the fitted sink cover converts the sink into a practical chopping board for freshly washed vegetables.

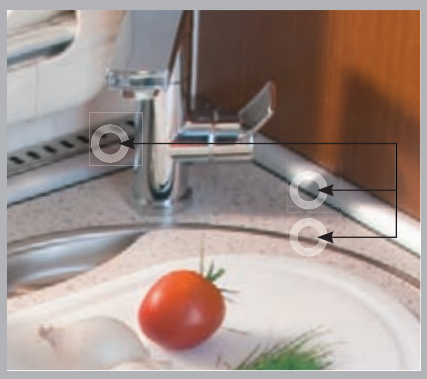

Integrated refuse bin:
A perfect solution for kitchen waste is also onboard. A refuse bin directly under the sink offers space for all of the waste products from cooking.

Kitchen wipes always at hand:
In the floor layout with side kitchen, the high refrigerator is connected to the work surface. Installed here above the sink is a practical wall shelving unit with kitchen roll holder. This leaves more free space on the worktop.

Illustrations for example only. Changes possible.

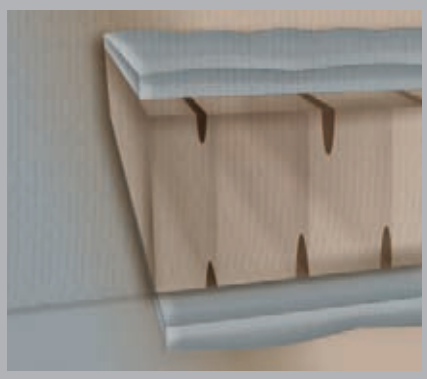

Hymermobil B-Class – Highlights from series production

Water-tight design:
All of the connecting joints in the kitchen area are sealed effectively with sealing tape and end strips. This means that the whole surface can be wiped down wet with no worries – and a few little splashes when cooking and washing up are really nothing to worry about.

A place for everything:
The large, easy to reach roof stowage cupboards above the kitchen are ideally suited for the storage of crockery and other tableware. Even if the motorhome is fully loaded, there is plenty of space here to cater for all of the passengers and guests.

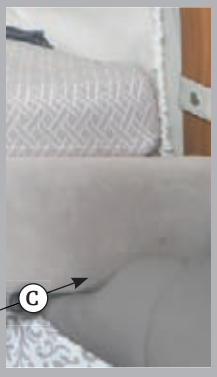

The highest level of sleeping comfort and a healthy sleep:
All of the beds are equipped with high quality multi-zone cold foam mattresses that support each area of the body accordingly. Breathable mattress toppers in the rear assure good ventilation.

Lights on for a night-time read:
At the head of every bed there is an adjustable reading lamp with LED light. The pull-down bed at the front is fitted with spotlights at both ends so that the sleeping direction can be changed if needed, e.g. if the vehicle is slightly slanted.

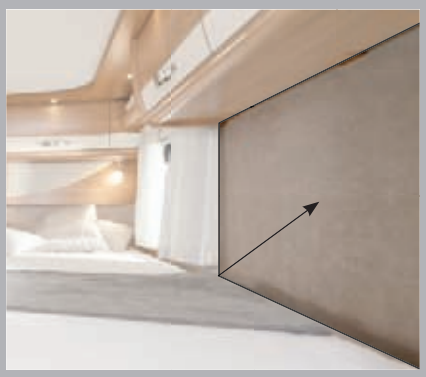

Greater sleeping comfort in the front:
The pull-down bed above the cab also offers maximum freedom of movement and head clearance (A). Its comfortable sleeping area can be used fully without restriction over the whole width of 1.50 metres (B) – even in the front area of the vehicle. In addition to these generous dimensions, the solid mounting of the pull-down bed also contributes towards its high standard of comfort. In lowered state, the bed rests positively and securely at the head and foot end (C). This makes it easy to climb into bed and is the assurance of an undisturbed and peaceful sleep.

More headroom in sleeping area:
Mosquito nets and blackout blinds are fully integrated in the frame of the large clear glass skylights (40 x 40 cm) above the rear beds. In this way, the skylights barely encroach on the interior and permit the full standing height.

Cosy bedroom atmosphere:
All of the walls in the sleeping area are equipped with a high quality microfibre coating. This soft surface creates a friendly and warm atmosphere and pleasant ambient sound. It can be cleaned easily if needed.

Into bed safely and comfortably:
Fixed steps with an extra large surface lead to the beds in the rear. They make it safe and comfortable to climb in and out of bed even in a sleepy state – such as a late night visit to the toilet.

Discover even more highlights at a Hymer trading partner near you.

Everything within reach:
There are plenty of stowage compartments and shelves directly on the bed so that glasses, books and drinks are always within reach, even at night. They remain within easy reach even if the single beds in the rear are connected together to form a slumber island.

Lots of stowage space above the beds:
On the backwall and at the foot end of the beds there are large, deep roof storage cupboards, which offer an additional means of storage, e.g. for clothing. This utilises the "air space" above the beds optimally without limiting freedom of movement.

Well stowed away in washroom:
Spacious washroom cabinets with lots of stowage space make it easy to store all of the utensils required, while keeping them in reach. Small and sensitive items are protected reliably by standard securing straps in the shelves and stay this way when the vehicle is in motion.

Space to stand upright in washroom and shower cubicle: With a standing height (A) of 1.98 metres, the double floor mobile home offers the highest level of washing and showering convenience. This is made possible by the multi-purpose double floor of the vehicles, which houses the sunken shower tray and all of the necessary drainage lines.

Optimal drainage guaranteed:
All of the shower trays are equipped with two opposing drain holes. In this way, the shower water can also flow away quickly and without restriction if the vehicle is parked on uneven ground or on a gradient.

Flexible space concept:
All Hymer open washrooms can be used in a variety of ways. As a large and open washing and dressing room with high quality wooden sliding door to the living space. Or individually as a lockable shower cubicle and lockable washroom cum toilet cubicle with rolling doors.

Hand wash without wet feet:
The spacious and comfortable washroom has a separate shower cubicle with fixed walls and its own standing space in front of the washbasin.
The wide, high quality bench toilet is particularly comfortable and easy to clean.

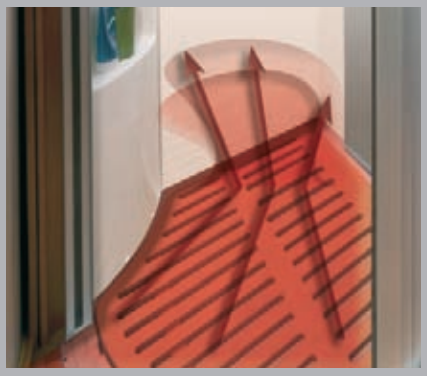

Leak-tight installation:
The shower tray and shower walls are connected to each other through a shell design so that water cannot escape through the joints. Thanks to this leak-tight construction, the use of silicon for sealing purposes was reduced to a minimum.

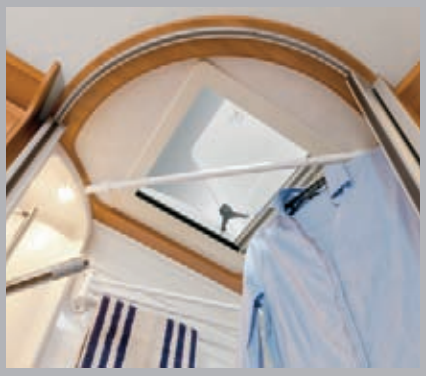

Almost like real porcelain:
The high quality washbasins made from classy "cool glass" are attractive, extremely sturdy and durable. As far as looks and feel are concerned, it is very similar to porcelain. Unlike conventional washbasins, scratches and damage can simply be polished out.

Illustrations for example only. Changes possible.

Hymermobil B-Class – Highlights from series production

Warm feet all the time:
Thanks to its position in the heated multi-purpose double floor, the sunken shower tray is always at a pleasant temperature. Directly under the tray is an additional hot air feed that ensures feet stay comfortably warm throughout the shower cubicle.

For drying, airing and storage:
The sturdy, fold-out clothes rail in the shower is ideal for drying wet clothing without taking up too much space. If required, it can also be used as additional storage space for holiday attire – or simply for airing clothes.

Toilet emptying made easy:
With its easy to read electronic fill level indicator, the Thetford toilet shows exactly when the black water tank needs to be emptied. The swivel drain point of the tank makes emptying easy and secure, even in tight spaces.

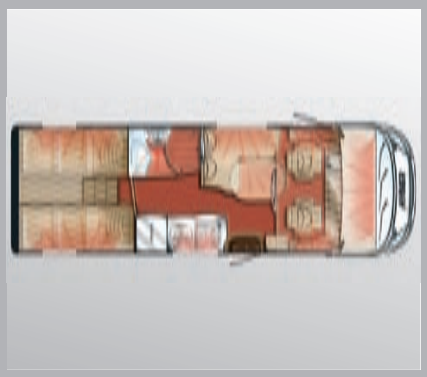

Well aired, well protected:
Large frosted glass skylights (40 x 40 cm) in the washroom and shower cubicle uphold privacy and allow water vapour and steam to escape quickly. Mosquito nets and blackout blinds are integrated in the flat frame, meaning standing height is not impaired.

High heating power included:
With 6.000 watts of power, the Truma Combi 6 heater, installed as standard, has no trouble bringing the temperature inside the vehicle up to a cosy level even when it is freezing outside. Thanks to its central location under the seating group, the heat is distributed optimally throughout the vehicle.

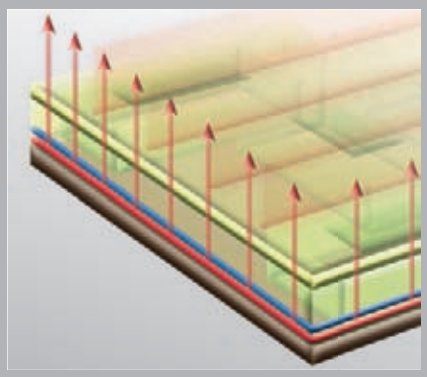

Hot air curtain against windscreen:
The living area heater also supplies the instrument panel with hot air when the vehicle is parked up for camping. The hot air rises against the windscreen here like a curtain and keeps backs warm when the driver and co-driver seats are turned around.

Perfectly cosy throughout:
The numerous hot air vents inside the vehicle and in the exterior stowage compartments are positioned precisely so that an optimal heat distribution is achieved. Every model series is repeatedly tested and perfected in the cold chamber for this purpose.

Heated exterior stowage compartments:
Both the huge garage in the rear and also the stowage compartment beneath the lounge bench seat are supplied with hot air from the heating system. In this way, cold-sensitive objects and items of luggage can be stored there without worry.

Frost-proof installation:
All of the motorhome's water lines are routed in heated areas, which means that they are protected safely against frost damage. The fresh water and grey water tanks are housed in insulated trays in the multi-purpose floor and are surrounded there by hot air.

Secure power supply: The powerful AGM leisure battery with 95 Ah is located close to the heater in the heated stowage compartment under the seating group and, if required, can also be extended to two units with additional charger. This means that sufficient power can be supplied safely even at constant low temperatures.

Backwall circulation against condensation: All of the roof storage cupboards have a void at the back through which warm air can circulate unhindered. In this way, high temperature changes in the interior and undesired condensation can be avoided.

Easily accessible drain valves: The whole supply installation system is designed so that all units are protected in the best way but still have easy access.

Direct access to the tank: Checking and cleaning the grey water tank is also especially easy and convenient. The cover of the tank is located directly beneath the floor flap and can be accessed with ease from the interior.

Clear route to fresh water: Likewise in the interior of the vehicle under an additional floor flap is the access point to the fresh water tank. The rotary knob to open and close the overflow has a central location and the large flap is ergonomically formed.

Practical trip switch: Unlike the central power supply unit, the trip switch is not located in the double floor but in the wardrobe where it can be reached comfortably. In this way, power can be restored quickly should the switch be tripped.

Vehicle services at a glance: The fresh water and grey water levels, the battery voltage, the load at the 230 V sockets and additional data readings can be taken from the well laid out control panel above the entry door. This means that the current service levels are always in check.

Parking for bulky and heavy items: In the huge rear garage there is plenty of space for bikes placed side-by-side. Even scooters or heavy, bulky items of luggage can be stowed here optimally – up to a maximum permissible load of 350 kilograms.

Access from the inside and out: The heated maxi stowage compartment under the L-seating group is accessible both from the interior as well as via the large exterior flap. From the outside, it can be loaded on two levels at the same time and from here it is also possible to reach into the living space.

Illustrations for example only. Changes possible.

Hymermobil B-Class – Highlights from series production

Safe and secure from outside:
All of the exterior stowage compartments feature sturdy, ergonomic rotary knobs that ensure optimal closing security.
The first 180 degree turn closes the door and an additional 180 degree turn presses the door into the frame with a tight and flush fit.

Cellar space:
A sizeable amount of the multi-purpose double floor can be used as a practical heated stowage compartment. The diverse cellar compartments can be accessed easily from the interior via flush-fit floor flaps, which blend in unobtrusively with the living space floor.

Fold up and pack away:
Beneath the central lounge bench seat there is an additional large stowage space, which can be opened by folding up the seat padding. The integrated fabric hinges make opening and closing especially easy and convenient.

Maximum storage space under the roof:
Throughout the vehicle, a large number of extra deep roof storage cupboards provide plenty of space for holiday clothing, utensils and luggage. Thanks to their sturdy self-supporting design, they are also well suited for heavier items.

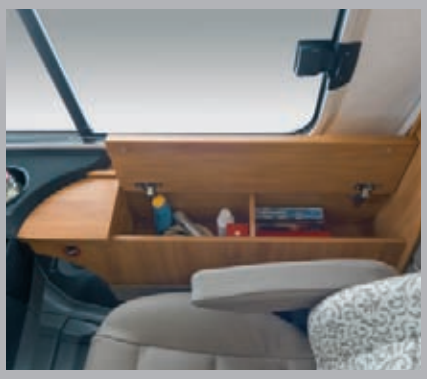

Cubby-hole opportunities:
Under the roof storage cupboards, spacious cubby-holes serve as an additional means of stowage – both in a decorative as well as a practical sense.
A neatly integrated rail prevents items from falling out when the vehicle is in motion.

Within easy reach at night:
Numerous stowage compartments and cubby-holes can also be found on the rear beds. Spectacles, books and drinks can be stowed here within easy reach, right next to the pillow end. This means that there is no need to fumble around and everything is always easy to find when getting up in the night.

Discover even more highlights at a Hymer trading partner near you.

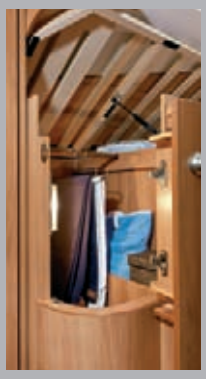

Stowage space for co-driver:
For maps, books and everything that is needed for the journey, a spacious sideboard in the co-driver's door offers adequate means of storage.
It has a high quality wood finish and can be used as a practical shelf when closed.

Scope for head cooks:
Thanks to its generous pull-out drawers, the large kitchen cupboard under the worktop can be used to its full extent for food supplies and kitchen accessories. The spacious drawers can be divided flexibly so that items of any size can be stowed optimally.

Lots of space for holiday clothing:
In the spacious wardrobes of the motorhome, lots of clothing can be hung up or folded away. In addition to the wardrobe under the rear beds, most of the floor layouts feature a flexible high cabinet.

Flexibility off the rail:
The high cabinets of the Hymer motorhomes can be adapted to individual requirements thanks to the adjustable shelves (B).
One of the shelves features an additional clothing rail (A), which means that garments can be hung up on two levels.

For even more individual class

Would you like to enhance your B-Class even further in terms of performance or comfort? Your Hymer trading partner is happy to provide you with details about all of the additional equipment features available for your dream vehicle. A selection of the main extras can be seen on this page.

Individual brightness:
The high quality aluminium rims afford the vehicle additional individuality and class even on the outside. Thanks to its low weight, not only are there payload reserves but the effectiveness of the suspension is increased, thereby improving driving comfort as well.

Relaxed driving:
The Fiat Comfort-Matic combines the precision of a 6-speed gearbox with the comfort of an automatic. Gear changes are either manual, by tipping the selector lever, or fully automatic – with optimised function and consumption.

Driving comfort with cruise control:
Comfortable and safe at a steady, controlled speed – the onboard cruise control system makes this possible. If the set speed is exceeded, the integrated Speedtronic alerts the driver.

Highest level of leak-tightness:
The vehicle roof is made from sturdy aluminium and has no longitudinal seams through which water could ingress from above. As additional protection against weather and hailstones, a GFK coating serves to prevent mechanical damage to the surface of the roof.

Well in sight when manoeuvring:
The reversing camera captures the area behind the motorhome and transmits the image in full width to the 7 inch colour monitor in the cab. Its integrated heater guarantees clear view in winter in the event of ice and snow.

Hard, level standing:
With the convenient corner stays at the rear of the vehicle, the motorhome can be stabilised when parked. This means that the sleeping area, in particular, is not prone to movement on the springs of the suspension. The corner stays can also compensate for slight unevenness of the ground.

Darkness at the press of a button:
The electric roller blinds of the windscreen darken the cab area in a pleasant way. As an additional guard against cold and direct sunlight it also contributes towards a cosy atmosphere all year round

Room with a view:
The large panoramic skylight (80 x 50 cm) above the rear beds lets lots of daylight into the interior and provides a clear view to the starlit sky at night. Its counterpart in the living area is fitted with heat-insulated double glazing.

High tech in the kitchen:
The tall TEC-Tower is a superlative item of modern kitchen equipment in the motorhome. It comprises a fridge freezer unit (160 litres), an oven and a grill in a timeless classy design and impresses not only in terms of looks but also as a versatile helper.

Heating with hot water:
As a high quality alternative to hot air heating, the ALDE hot water heating system delivers particularly comfortable warmth with its diverse convectors - at the instrument panel as well. If desired, the system can be ordered with an energy-saving heat exchanger.

Electric drop-down bed:
The 1.50 metre wide drop-down bed above the cab can be raised and lowered electrically with no effort whatsoever. The switch for the jolt-free electric drive is integrated on the front of the bed and can be reached from the living space with ease.

Pin-point support:
The Hymer comfort sleeping system with high quality disc-type bed frames go hand-in-hand with the multi-zone cold foam mattresses for optimal comfort. Each area of the body is supported with just the right amount of counter-pressure with pin-point accuracy – for a cosy, peaceful sleep.

Sit in comfort in the shower:
As an equipment option for all Hymer open washroom showers, the integrated folding wooden seat offers the chance to sit down and rest and also provides an opportunity to store utensils. It has the same design as the slatted wooden frame and is simply folded up when not in use.

Perfect audio experience:
Music lovers have a real treat in store with the Hilse Soundbox. As a digital sound processor (DSP) with integrated output stage (4 x 30 W), it prepares the audio signals for the loudspeakers installed in the cab, living space and rear optimally.

B 698 3.500 kg – 4.250 kg

Note:

This brochure describes the series status at the time of publication. Some of the photos contain optional extras. Despite careful checking of the contents, printing errors are not excluded. During the course of the model year, we reserve the right to make changes to equipment or product improvements. Before entering into a sales contract, please find out from our authorised Hymer dealership about the current product and model status.
In some cases, the vehicles are illustrated with optional extras that are contained in the valid price list and for which additional payment is required. The decorations illustrated are not part of the Hymer scope of supply. The specifications concerning the scope of supply, appearance, performance, dimensions and weights of the vehicles – dimensions within the scope of factory tolerances (max +/– 5%) are possible and permitted – correspond to the state of knowledge valid at the time of printing. They comply with European homologation regulations; these regulations may change up to the time of vehicle purchase or up to the time of delivery. Your Hymer dealer will be delighted to inform you of any changes and about the standard scope of supply.
